## Experience

- **JAYPAR TECH - 2022 - 6 Months**
  **Trainee MERN Stack Developer**

- **Onilma - 2022 - 4 Months**
  **Work With External Project - Part Time ( As a Developer )**

## Projects

**Ayanna Kiyanna Institute Management System - Web App**          Github Link
- Client Project - **Technology Used** : MERN Stack

It is expected to provide complete facilities to the users using this web application built for a Sinhala educational institution. This is temporarily deployed.

**Tourism and Travel Management System - Web App**          Github Link
- Uni Project - **Technology Used** : HTML/CSS/JS/PHP

The system is designed to facilitate travelers and fulfill their accommodation requirements. The aim is to improve the tourism industry in Sri Lanka.

**Event Planning System - Web App**          Github Link
- Uni Project - **Technology Used** : MVC Architecture

This system has been designed to manage various types of events and to provide all the necessary facilities for them in a very flexible manner.

**Computer Shop Management System - Web App**          Github Link
- Uni Project : **Team Leader** - **Technology Used** : MERN Stack

This system has been designed for a trading company that sells computers and technical equipment, and has provided the necessary facilities to manage their entire business well.

**Programming Application Framework Project - "Foodies"**          Github Link
- Uni Project - **Technology Used** : MAVEN , Spring Rest API, MySQL

The social media platform for foodies is a web-based platform where food and beverage reviewers can share their experiences and opinions on various restaurants, cafes, bars, and other food-related businesses. The platform aims to connect foodies from around the world, allowing them to discover new dining experiences, share recommendations, and connect with like-minded individuals.

## Tools :

- VS / VS Code
- Eclips
- Android Studio
- Postman
- Github / Git bash
- SQL Server
- Figma ( UI/UX )
- Office 365

## Personal :

- Problem Solving / Risk Management
- Concept Creation
- Team Communication
- Leadership Skill
- People Skill

## Working Skills :

- Web site Development
- Web App development
- Mobile Application Development
- Software Development
- Design UI/IX
- Web Deployment (Hosting)
- Graphic Design
- Logo Design
- Create Documents (Office 365)
- Front-End Development
- Back-End Development

## Bio :

- Birth day - 2002.01.22
- Gender - Male
- Marital status - Unmarried
- Age - 21

---

### peace, justice and strong institutions (SDG 16) - Web App          **Github Link**

- Uni Project - **Technology Used** : MERN Stack

I created and implement this system to fit the entire world in order to achieve the 16th Sustainable Development Goal with new research part.

### Car service Management System - Android App          **Github Link**

- Uni Project - **Technology Used** : **Mobile App** : JAVA, firebase, XML

This system is designed for a car service business to manage their business and provide superior service to their customers.

### Smart Sinhala Alphabet ( Personal Research Project )          **Github Link**

- Personal Research - **Technology Used** : React Js

This is the first time in the world that a smart alphabet has been created for an alphabet. This has been attractively designed by me including very important and accurate data about the Sri Lankan Sinhala alphabet.

### E-Commerce Platform          **Github Link**

- Personal Project - **Technology Used** : .Net (C#) , React.Js, SQL

This system is designed for a E-Commerce Platform to manage their business and provide superior service to their customers.

### Human Computer Interaction Project          **Github Link**

- University Project - **Technology Used** : . Figma, Prototype

I have selected the website "riyasewana" for our project since it allows users to buy, sell, and post information on vehicles and spare parts. There are several faults across the website, and the user interfaces are hopelessly outdated.

### Information Assurance & Security Project          **Github Link**

- University Project - **Technology Used** : . OCTAVE-A framework.

This coursework allows to extend your knowledge and understanding of the use of "information asset risk worksheet" introduced in OCTAVE-A framework.

### Portfolio          **Github Link**

- Personal - **Technology Used** : . HTML,CSS,JS

This is my Personal Website. Referring this website users can understands About me and Hire or Contact me.
