Kavindu Jayasinghe

Trainee Software Engineer

A person who likes to try new things, always works creatively, and handles any task with dedication and responsibility. Shows talent in the IT industry, learns new things and works hard to achieve goals. A good person with leadership qualities who can work harmoniously and successfully with others. A humble and honest character.

Projects And Experience

Ayanna Kiyanna Institute Management System - Web App — Github Link

- Personal Project - **Technology Used** : MERN Stack

It is expected to provide complete facilities to the users using this web application built for a Sinhala educational institution. This is temporarily deployed.
Hosted Link : Click Here

Tourism and Travel Management System - Web App — Github Link

- Uni Project - **Technology Used** : HTML/CSS/JS/PHP

The system is designed to facilitate travelers and fulfill their accommodation requirements. The aim is to improve the tourism industry in Sri Lanka.

Event Planning System - Web App — Github Link

- Uni Project - **Technology Used** : MVC Architecture

This system has been designed to manage various types of events and to provide all the necessary facilities for them in a very flexible manner.

Computer Shop Management System - Web App — Github Link

- Uni Project : **Team Leader** - **Technology Used** : MERN Stack

This system has been designed for a trading company that sells computers and technical equipment, and has provided the necessary facilities to manage their entire business well.

Car service Management System - Android App — Github Link

- Uni Project - **Technology Used** : **Mobile App** : JAVA, firebase, XML

This system is designed for a car service business to manage their business and provide superior service to their customers.

peace, justice and strong institutions (SDG 16) - Web App — Github Link

- Working ON - **Technology Used** : MERN Stack

I look forward to creating and completing this system to fit the entire world in order to achieve the 16th Sustainable Development Goal.

Programming Application Framework Project - Web App — Github Link

- Working ON - **Technology Used** : MAVEN Project

I hope to successfully create and complete this project which is being created related to programming application framework.

Personal Research Project : — Github Link

Smart Sinhala Alphabet

- Personal Research - **Technology Used** : React Js

This is the first time in the world that a smart alphabet has been created for an alphabet. This has been attractively designed by me including very important and accurate data about the Sri Lankan Sinhala alphabet.
